

Tutorial For Pussykat [YuumiBot Client](#) 0.1

06/09/2020 by Accessibility Soldier

1 SCRIPT INSTALL

- 1) Download the latest stable version of Yuumi Bot.lua available on the [Pussykat Discord](#) or on the [GOS forum](#)
- 2) Do the normal script installation in GOS Scripts folder.

- 3) In Loader.exe leave YummiBot and its dependencies (GG Orb) checked

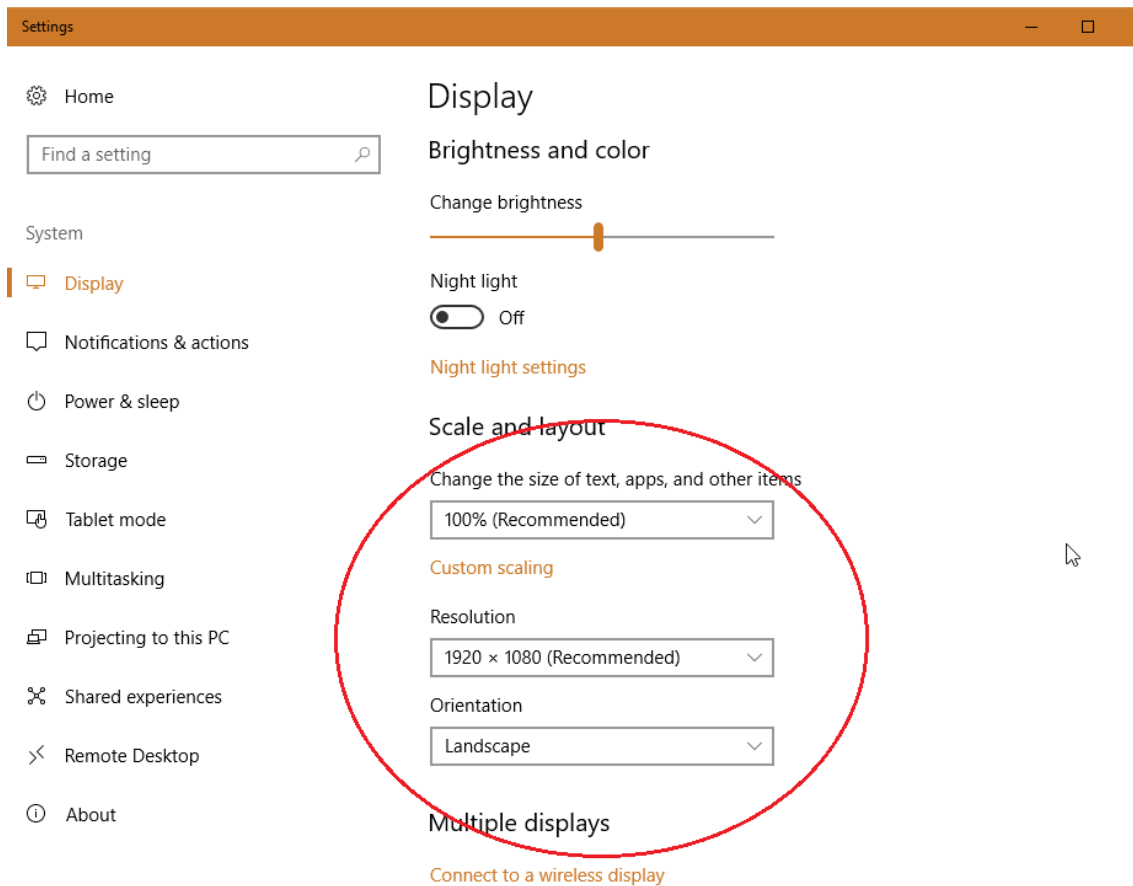

2 USING THE CLIENTE

1) OPEN THE LOL CLIENTE

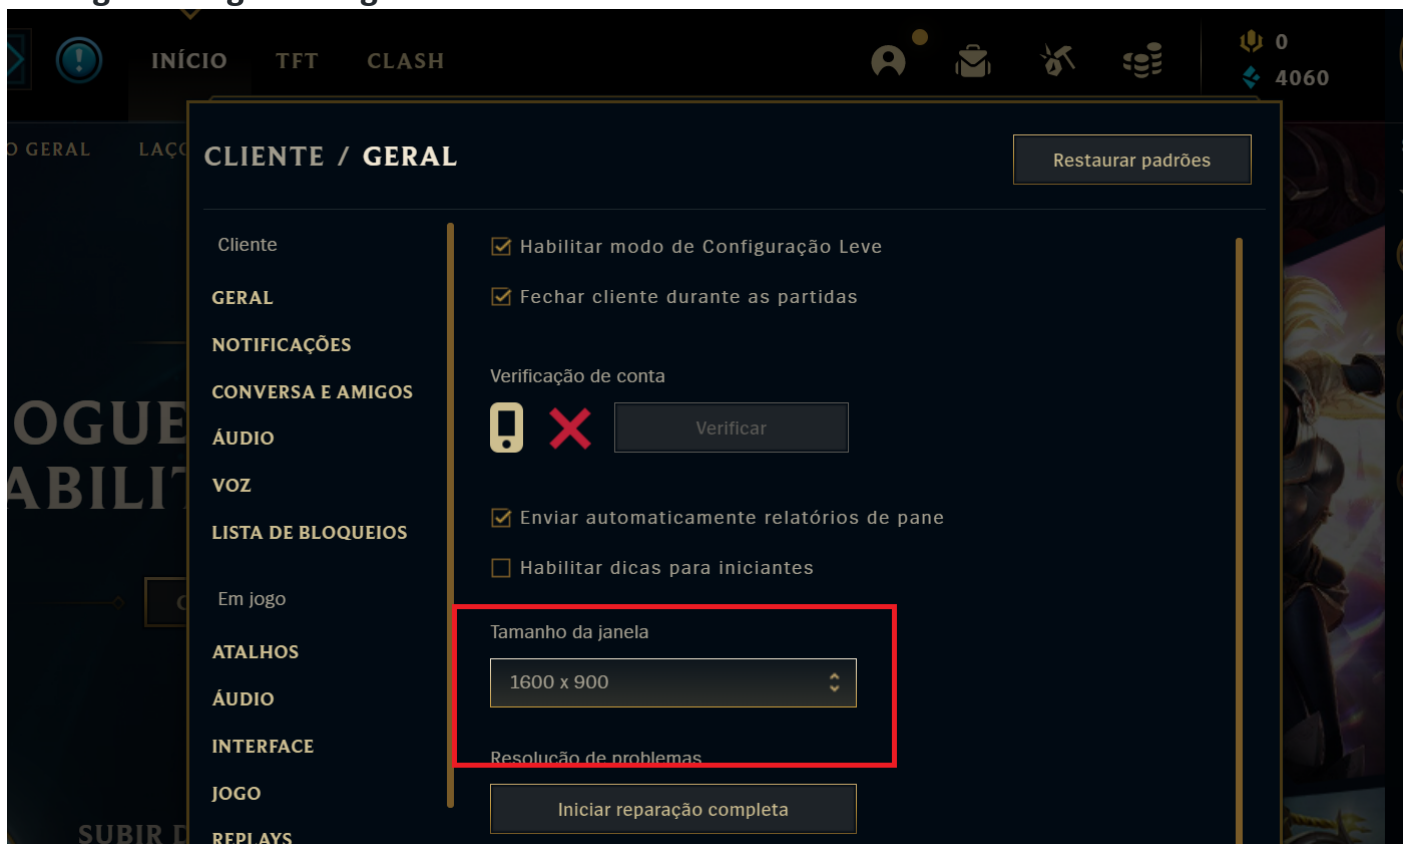

2) LOG IN WITH YOUR ACCOUNT AND LEAVE IT MARKED "STAY CONNECTED"

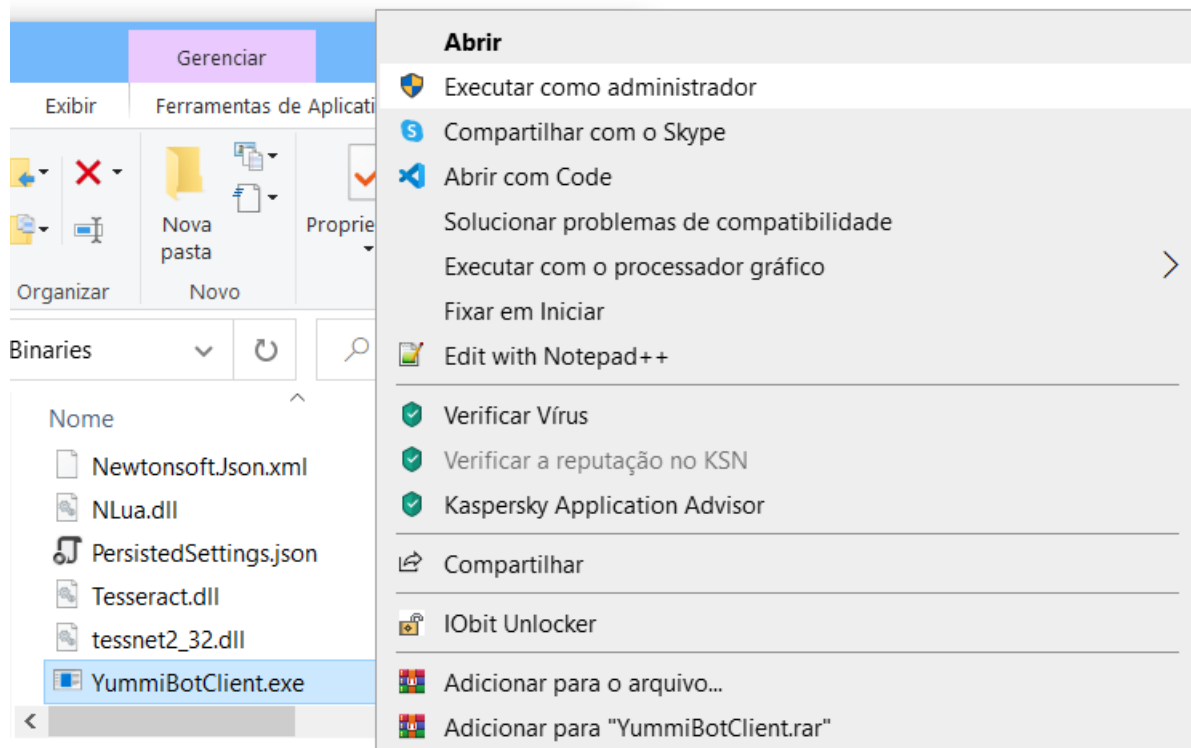

3) Ensure your display settings are configured correctly

Then go to league of legends client and set windows size to 1600 * 900

Start Client

After that just wait for the match to start
